1. Our Supplier has been providing the highest quality prefabricated steel buildings across the globe for over 27 years.
2. All pre-engineered buildings include Lifetime Engineering and a 30-Year Warranty.
3. Our buildings are built with heavy gauge commercial grade steel making them the strongest building on the market, capable of spans up to 150 feet wide.
4. All prefabricated buildings are mill coated with Galvalume Plus steel coating providing a dry-coated, maintenance-free finish that keeps buildings cool in the summer & easy to heat in the winter.
5. We save you time and money as compared to other steel structures. Our pre-engineered buildings are designed for easy construction as well as hassle-free maintenance for the life of your building. Our prefabricated buildings are precision pre-cut and pre-drilled using only one size nut and bolt.
6. Our buildings feature flexible clear span construction allowing you maximum space efficiency.
7. We provide unparalleled customer service before and after your building purchase.
